PREFACE

Sample Report

OBJECTIVE

RELIABLE

A LIST OF ADVANTAGES

- yStats.com provides secondary market research: By using various sources of information we ensure maximum reliability of all obtained data. As a result companies get a precise and unbiased impression of the market situation.
- Only reliable sources such as national and international statistical offices, industry and trade associations, business reports, business and company databases, journals, company registries and news portals are used as a basis for the analyses, statistical reports and forecasts.
- Our international employees research and filter all sources and translate relevant information into English. This ensures that the content of the original studies is correctly interpreted.
- yStats.com delivers all research results as PowerPoint files. All data can therefore be used directly for board presentations or be individually adapted.
- If required, yStats.com provides in-depth analysis for all research projects. Simply send us a request.

TERMS OF USE AND COPYRIGHT CONDITIONS

GLOBAL SITE LICENSE

■ allows up to ten (10) user of a company worldwide to access the downloaded report.

GENERAL METHODOLOGY OF MARKET RESEARCH REPORTS

OBJECTIVE

RELIABLE

Sample Report

Secondary Market Research

- The reports are compiled based on secondary market research. Secondary research is information gathered from previously published sources based on information and data acquired from national and international statistical offices, industry and trade associations, business reports, company databases, journals, company registries, news portals and many other reliable sources. By using various sources we ensure maximum objectivity for reported data. As a result, companies gain a precise and unbiased impression of the market situation.
- Cross referencing of data is conducted in order to ensure validity and reliability.
- The source of information and its release date are provided on every chart. It is possible that the information contained in one chart is derived from several sources. If this is the case, all sources are mentioned on the chart.
- The reports include mainly data from the last 12 months prior to the date of report publication. Exact publication dates are mentioned in every chart.

Definitions

- The reports take into account a broad definition of B2C E-Commerce, which might include mobile commerce. As definitions may vary among sources, exact definition used by the source (if available) is included at the bottom of the chart.

Chart Types

- Our reports include text charts, pie charts, bar charts, rankings, line graphs and tables. Every chart contains an Action Title, which summarizes the main idea/finding of the chart and a Subtitle, which provides necessary information about the country, the topic, units or measures of currency, and the applicable time period(s) to which the data refers. With respect to rankings, it is possible that the summation of all categories amounts to more than 100%. In this case, multiple answers were possible, which is noted at the bottom of the chart.

Report Structure

- Reports are comprised of the following elements, in the following order: Cover page, preface, legal notice, methodology, definitions, table of contents, management summary (summarizing main information contained in each section of report) and report content (divided into sections and chapters). When available, we also include forecasts in our report content. These forecasts are not our own; they are published by reliable sources. Within Global and Regional reports, we include all major developed and emerging markets, ranked in order of importance by using evaluative criteria such as sales figures.

Notes and Currency Values

- If available, additional information about the data collection, for example the time of survey and number of people surveyed, is provided in the form of a note. In some cases, the note (also) contains additional information needed to fully understand the contents of the respective data.
- When providing information about amounts of money, local currencies are most often used. When referencing currency values in the Action Title, the EUR values are also provided in brackets. The conversions are made using the average currency exchange rate for the respective time period. Should the currency figure be in the future, the average exchange rate of the past 12 months is used.

METHODOLOGY OF THE CURRENT

Sample Report

OBJECTIVE

RELIABLE

Report Coverage

- This report covers the online payment market in Europe. It takes into account a wide definition of online payment, including payment methods used in online shopping and mobile payment, such as remote and proximity payments.
- The major countries in the region are covered, while data availability varied across the markets.
- The report includes data mostly published within the previous 12 months. The exact date of publication of the source is stated on each chart. The time period which the data refers to differs by source.

Report Structure

- The global chapter opens the report, featuring an overview of global online and mobile payment developments.
- Next, information about regional development and country comparisons are included.
- The rest of the report contains country-specific information. Countries are grouped by advanced and emerging B2C E-Commerce markets. Within each group, the countries are presented in the descending order of B2C E-Commerce sales.
- Depending on data availability, the following types of market information are included: payment methods most used by online shoppers, breakdown of E-Commerce sales by payment methods, trends in online payment security and fraud, number and value of online/mobile payment transactions, and mobile payment user penetration. Not all the mentioned types of information are available for each of the covered countries.

DEFINITIONS

OBJECTIVE

RELIABLE

The following expressions and definitions are used in this Online Payment market report*:

- **ONLINE PAYMENT** Transfer of money made over the Internet following a consumer's payment command, includes payments for goods and services purchased in B2C E-Commerce and M-Commerce.
- **MOBILE PAYMENT** A wide definition of mobile payments includes payments made remotely in M-Commerce and proximity payments made in-store, such as via QR code scanning and NFC technology.
- **PROXIMITY MOBILE PAYMENT** A mobile payment where the merchant and the consumer are present in the same location and the interaction between the consumer's device (card, mobile device) and the POS is conducted using a proximity technology (e.g., NFC).
- **NFC & CONTACTLESS PAYMENT** Near Field Communication is a set of standards to create radio communication by bringing devices close together or having them touch each other. In that way, contactless data exchange and contactless payment transactions using an NFC-enabled smartphone or other mobile device can take place. Similarly, contactless payments can be made by credit and debit cards enabled with the contactless technology.
- **ALTERNATIVE PAYMENTS** Generally, refers to payment methods other than credit card or bank card payments. Widely defined, alternative online payment methods include bank transfers and direct debit, digital wallets, pre-paid cards and private label cards, invoice, and digital currency. May also include cash on delivery and card schemes by local companies other than global card brands.
- **E-WALLET** A prepaid digital account, allowing users to store money and use it in online or mobile transactions. The examples of E-Wallets or digital wallets include Alipay and PayPal.
- **MOBILE WALLET** A software solution that enables consumers to store payment credentials, such as credit or debit card information, and use the stored credentials to pay digitally for transactions made in-store, online or via mobile. Mobile wallets are installed on mobile devices which are used to complete payments. The examples of mobile wallets include Apple Pay, Samsung Pay and Google Pay. Mobile wallets are often included in the broader category of E-Wallets or digital wallets.
- **INSTANT PAYMENTS** Electronic payment solutions for retail which are available 24/7/365 and thus result in immediate or close-to-immediate interbank clearing of transactions and crediting of the payees' accounts and confirm the payment to the payer after payment initiation.
- **B2C E-COMMERCE** The sale of products (and services) through electronic transactions via the Internet from businesses to consumers.

Note: *the definitions used by the original sources might differ from the ones stated on this chart; the exact definition used by each source, where available, is included on the respective charts

In April 2023, eCash was the preferred online payment method of 28% of respondents in Germany who had used it in the past 12 months

Germany: Share of Respondents Who Used eCash in the Past 12 Months and Stated It as Their Preferred Online Payment Method, in %, April 2023

Definition: eCash refers to electronic cash enabling consumers to pay without using any physical currency. Consumers convert the money stored in their bank accounts to eCash to make online payments or P2P payments

Survey: based on a survey of 14,500 consumers in the US, UK, Canada, Germany, Austria, Italy, Bulgaria, Mexico, Colombia, Argentina, Peru, Chile, Brazil and Ecuador, conducted in April 2023. The participants were split by age and gender

Source: Paysafe & Sapio Research, June 2023

70% of online purchases in the Netherlands were made via iDEAL as of April 2023, followed by credit card at 8% .

Netherlands: Top 3 Payment Methods Used For Online Purchases, in % of Online Purchases

Note: does not add up to 100% due to multiple answers possible
 Definition: iDEAL is an E-Commerce payment system used for online banking in the Netherlands. It is an online payment method allowing users to pay online through their bank.
 Survey: based on a survey of 22,411 gross individuals and a net of 10,343, across Netherlands, aged 15+, conducted between 5th April – 30th April
 Source: Thuiswinkel, GfK, Retail Insiders, Dutch Payment Association & PostNL, March 2023
